

## ***RxPak Solutions***

**Choose RxPak as your resource for innovative, customized and cost-saving brand medication repacked using industry-leading packaging and compliance techniques.**

### **How We Deliver Improved Pharmacy Performance**

Leveraging our parent company’s purchasing power and strong relationships with manufacturers, RxPak offers repackaged brand prescription medications. We purchase these medications in bulk containers from manufacturers, and then repackage them into usable quantities, passing along the cost savings to pharmacies.

To ensure the safety and quality of its repackaged products, RxPak operates a state-of-the-art, FDA-registered pharmaceutical repackaging facility that complies with Current Good Manufacturing Practices (cGMP) and maintains rigorous quality controls.

Once repackaged, the products move directly to McKesson’s regional distribution centers, so that pharmacies can order and receive them quickly and efficiently. RxPak is committed to delivering fully compliant and the most efficient and cost-effective repackaged products available to pharmacies.

### **With RxPak, your pharmacy will benefit from:**

- Brand-name pharmaceuticals at reduced prices
- Increased pharmacy profitability
- Increased inventory turns
- Reduced pharmacy investment
- Industry-leading McKesson delivery

### **Manufacturer Service Capabilities**

Providing designs and delivery that meet your unique product needs is what we do.

Choosing the right business partner is critical. As your packaging partner, RxPak helps you reduce capital expenditures, optimize production efficiency, and reach pharmacies and patients through multiple channels.

Combining our services with the nation’s largest pharmaceutical distributor helps deliver your product into the supply chain as quickly as possible — often on the same day that it is packaged.

### **RxPak offers you:**

- Expertise in consumer-friendly compliance packaging
- Turnkey primary and secondary packaging
- Innovative packaging engineering and custom design capabilities
- Proven technology in child-resistant and senior-friendly packaging
- Serialization packaging for simplified, effective prescription adherence
- An experienced team supporting new product launches

### **Patient Adherence Is Critical**

Increased pressure on healthcare service providers to deliver high-quality care at lower costs has heightened the demand for medication packaging that helps pharmacists deliver more personalized service and improves patient adherence to treatments. Compliance packaging can be a true differentiator for pharmacies while delivering increases to clinical performance and their bottom line.

### Comprehensive Packaging Options

State-of-the-art, blister-based compliance packaging, traditional bottling and more provide you with the options that help drive sales.

#### Blister packaging for solid-dose products

- Five fully automated, high-speed blister packaging and cartoning lines
- Cutting-edge blister compliance packaging formats drive adherence to medications and include award-winning:
  - Burgopak™ (exclusive licensee for U.S. and Canada)
  - ShellPak® (all format sizes)
  - MedLock EZ™ (environmentally-friendly compliance)

#### Bottle packaging

- Four fully automated bottling lines offer performance and quick flexibility to change products utilizing electronic filling technology

#### Deep-draw thermoforming

- Versatile custom packaging for large-format products such as vials, ampoules, syringes and inhalers

#### Additional services

- Kit assembly, physician sampling, heat seal carding and various other secondary and custom packaging

### An Environmentally-Friendly and Compliant Facility Designed for Success

RxPak is approved and qualified by leading brand manufacturers. Located in Memphis, Tennessee, our 150,000-square-foot facility has a state-of-the-art environmental monitoring system and eight automated lines built using Uhlmann and Cremer equipment.

#### RxPak's facility is:

- FDA-registered
- cGMP-compliant
- DEA-licensed for class II–V controlled substances
- ISO-certified with independent air-handling systems
- Climate-controlled in individual packaging suites

### Exceptional Quality Is Our Priority and Your Assurance

Our commitment to efficient, high-quality production ensures that you can be confident that your reputation is safe with us.

#### Leading quality controls at RxPak include:

- 100% online label verification
- Innovative Optel and Visiotec vision systems
- McKesson's Business Process Six Sigma group

Six Sigma requirements optimize efficiency and control costs. They have proven successful across McKesson's nationwide distribution network, resulting in 99.96% accuracy in order quality.
