

Solutions for Oncology

iKnowMedSM Generation 2

Innovative Technology. Advancing Patient Care.

Developed in collaboration with oncologists and building on a platform **trusted by more than 1,600 oncology providers**, iKnowMed Generation 2 is a powerful web-based electronic health record (EHR) that advances the quality and efficiency of cancer care delivery. iKnowMed Generation 2 can help your practice:

*From the team that built
the highest-ranked EHR for
oncologists and hematologists¹.*

Deliver High Quality Cancer Care

Comprehensive clinical information, including evidence-based clinical guidelines & pathways, are automatically updated to help providers make informed treatment decisions at the point of care.

Increase Provider Collaboration

Integrates modern interoperability standards to improve information sharing with patients, providers, patient care systems throughout the practice, and other ambulatory practices and hospitals in the community.

Personalize Workflow

Available anywhere, anytime and from any device, users can customize dashboards, charts, favorites, templates, order sets, notes and more so it is intuitive to use and easy to implement into daily practice.

Meet Regulatory Challenges

From Meaningful Use to ICD-10, product updates are delivered on-time and a dedicated team provides comprehensive regulatory support when you need it most. More than 90% of eligible providers using iKnowMed products successfully attested to Meaningful Use, receiving \$28 million in combined incentive payments since 2011².
